Personal Goals and Orientation

Personally inclined toward both the creative and analytical aspects of working, I Began studying frontend development in April 2022. My personal goals are to reach my full potential as a developer, mainly in frontend development but also in backend via a well-organized and ambitious corporation.

Education

- **Civil Engineer** - School of Pedagogical and Technological Education ASPETE
  📅 2010-2016

- **Greek Philology** - National Kapodistrian University
  📅 2017-2020

- **Full Stack Development** - University Of Helsinky
  Full Stack Open Course:
  Cerificate Link
  📅 2023

- **Full Stack Development** - University Of Helsinky
  Full Stack Open Typescript Course:
  Cerificate Link
  📅 2024

- - Free Code Camp
  Responsive Web Design:
  Cerificate Link
  📅 2024

- - Free Code Camp
  JavaScript Algorithms and Data Structures (Beta):
  Cerificate Link
  📅 2024

Languages

- **English:** Excellent

- **French:** Decent

Work Experience

- **Civil Engineer** - Technical Department of the Municipality of New Heracleion, Neo Heracleion, Attika

  📅 2015-2016   📍 Neo Herakleion-Attica

  During my stay at the Technical Service of the Municipality of Nea Irakleio, I dealt with dimensioning assessments on private projects on behalf of the Municipality, settling urban planning issues for both the Municipality and private individuals, as well as organizing tenders for the assignment of projects to private individuals.

- **Special Education Teacher** - To Monopati, Nafplio, Argolida

  📅 2020-2023   📍 Neo Herakleion-Attica

  Working as a special education teacher with kids of elementary and junior high school-level that face learning and coordination difficulties such as ADHD, mental disabilities and autism.

Technical Skills

- Frontend coding in ReactJs

- npm/yarn package manager

- Web apps and websites in NEXT.js

- Coding in TypeScript

- State Management with Redux and Recoil

- React Router for single-page apps

- Chakra UI and React Icons

- Cross-platform apps in React Native

- Framework Expo for React Native
- React Navigation for React Native
- CSS and Tailwind CSS
- VS Code and Vim
- GIT CLI
- Firestore/Firebase
- Vercel for deployment
- Node.js (Express)
- CRUD for full-stack development
- MongoDB locally and via Atlas
- Docker

Portfolio

- **Weather App with Next Js** - The application is built using the latest NEXT JS version and the UI is designed with the aid of Tailwind CSS. Weather forecast is real time displayed for the searched city across the world fetching data from the Open-Meteo.com API. The location coordinates are fetched from a MongoDB databse.
  Project Link

- **Professional website for a client** - Built with Next.js and utilizing Tailwind CSS for UI design. Used the email sender service from SendGrid for submitting messages through a contact form. The design is responsive for viewing on both computers and mobile phones.
  Project Link

- **AlphaOmega** - A web application built with Next.js and Typescript, designed for learning Ancient Greek using the Christian scriptures as a reference.
  Project Link

- **Burger Builder App** - An exercise in React.js, designed with Next.js and Tailwind CSS. Authentication is handled by Firebase. Users' profiles and orders are stored in a database (firebase-firestore).
  Project Link

- **Reddit Clone** - A forum clone similar to reddit, designed using Next.js, chakra UI, firebase and firestore.
  Project Link

- **Smart Verb Declenator App** - A web application created using Next.js and Tailwind CSS. Provides the complete declination of regular verbs in Ancient Greek.
  Project Link

Hobbies

Drawing with graphite and charcoal, oil painting and portraits, leather crafting, artistic bookbinding, and sibling crafts.
